WENTEX Pipes & Drapes | Cover wall

## WENTEX Pipes & Drapes

In the blink of an eye, Cover Walls transform a large hall into an intimate room, or make the front of house more appealing. WENTEX Pipes & Drapes is the multifunctional mobile system to place decorative curtain walls fast and efficiently. With different lengths of curtains and variable uprights and drape supports, nearly every set up imaginable can be built.

### WENTEX Pipes & Drapes are suitable as:

- Decorative covering
- Separation walls
- FOH / Camera surround
- Wardrobes
- Rope & Stanchion

## WENTEX Pipes & Drapes

WENTEX Pipes & Drapes is an easy to use system. This page will explain the basics, followed by complete explanations of all components.

WENTEX Eurotrack | Rail System

## WENTEX Eurotrack

WENTEX Eurotrack is a solid track system that can be easily installed for moving textiles for both temporary and permanent use. Using the connection strip, it is a fluently running track system and a variety of runners make it suitable for curtains as well as scenery. It can be used manually, but can also be operated using the optional rope system.

## WENTEX Eurotrack | Parts

### Rail

#### Sizes Rail (length)

200 cm

All pulleys for rope system for moving textile.

### Double pulley

Attachment over the rail

### Single pulley

Pulley for attachment above the rail

### Floor pulley

Attachment at the floor

### Pulley

Pulley for attachment weight bag

### Weight bag

5 kg / 11 lb

1 bag needed per 10 m / 32.8' of rail

### Operating rope

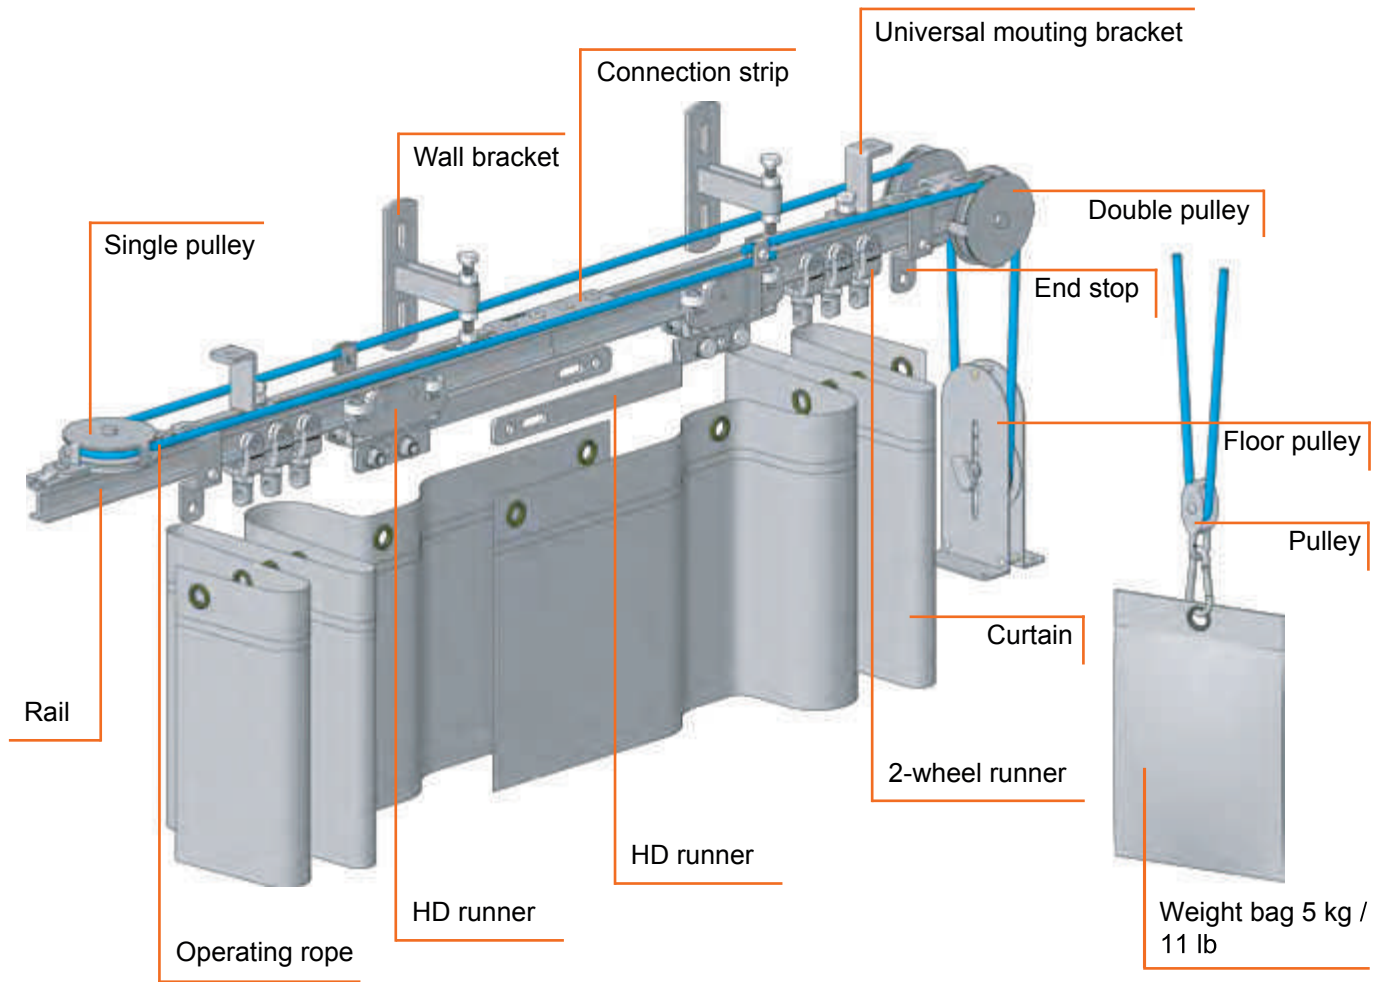

Provided on a roll of 100 m / 328'

### Manual switch

## WENTEX Eurotrack | System overview

The logo for WENTEX, featuring the brand name in a bold, white, sans-serif font inside a white rounded rectangle with a black border. The background of the entire image is a photograph of a large, modern interior space with a high ceiling of exposed metal trusses and beams. The space is filled with numerous vertical, thin, translucent fabric strips that hang from the ceiling, creating a dense, curtain-like effect. The lighting is dramatic, with strong red and blue hues. In the foreground, a large crowd of people is seated on the floor, looking towards the center of the room. The overall atmosphere is one of a high-tech, artistic event or performance.

WENTEX Textile Products | Voile

## WENTEX Textile Products

Our Textile products are the finishing touch for your stage, event or meeting. Backdrops, Pipes & Drapes, Stretch shapes, Spaghetti curtains or textiles for decoration are different ways to finish your event. The textiles are available in different colors and sizes. All our textile products are flame retardant following the DIN 4102-B1, NEN-EN 13501-1, NFPA701 and BS 5867 norm.

### WENTEX Textile Products are available as:

- Stretch shapes
- Stage skirts
- Spaghetti curtains

## WENTEX Textile Products | Stretch shapes

Stretch shapes are perfect for specialised decoration and can also be used as a projection screen. Available in three different shapes, square, triangle and diamond. Stretch shapes make great stage backdrops especially with LED lights.

### Attachment loop

## WENTEX Textile Products | Stage skirts

WENTEX high-quality stage skirts are made from the durable and flame-retardant MCS fabric. Perfect for any stage production or event, our skirts come in two versions: unpleated and pleated, so you can choose the style that best suits your needs. MCS fabric is a permanent flame retardant material, which means that it will remain fire-resistant for the lifetime of the skirt. This added safety feature gives you peace of mind, knowing that your production is in good hands. The unpleated version of our skirt is sleek and simple, providing a clean and professional look for your stage. The pleated version, on the other hand, adds a touch of elegance and sophistication, making it ideal for more formal productions.

Sizes		Metric

WENTEX SET Frames

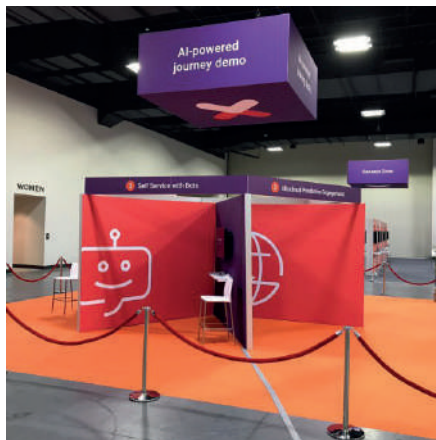

## WENTEX SET Frames

The Wentex SET Frame Module is a lightweight modular aluminum system for quickly and easily creating SEG applications like branding, exhibition stands or projection screens. It is a very modular system for a height of up to 6 meters / 20'. You can make the frame as angular and wide as you want. In addition, front projections are possible, as well as creating an intermediate compartment for seamless LED screen installations. This is an ideal framing solution for silicone-edge graphics at conferences, exhibitions, trade shows, seminars, and TV studios. SET Frame modules are available in different sizes, allowing you to create different combinations and setups with sizes in an increment of 25 cm / 1'. They are equipped with a quickly built-in stacking system. Clamps ensure that frames can be securely and seamlessly attached to each other and Wentex Base Plates can be used to create a strong and stable base.

### WENTEX

- A modules
- H modules
- Mounting supplies/accessoires
- 3D deco panel

## WENTEX A Modules

The A Modules build the top and bottom ends of your frame. They come with inner bracket connecting components for connecting corners and straight parts in one frame together. They slide into the profile that is extruded in the inside of the studs that make up the frame, much like keder strips. The included butterfly screws keep the straight and corner strips in place.

For a sturdy connection between multiple horizontally placed module frames, dedicated Module Clamps provide a fast and reliable link. Module Clamps are also available with an attached half coupler, which can be used to easily connect the frame to round tubing like Wentex Pipe & Drape Uprights or truss. For right-angled module connections there is the Module Clamp for Brace. This works like a regular Module Clamp, but an additional butterfly is included to fix the right-angled module in place.

Height (cm)	Width (cm)	Height (ft)	Width (ft)

69*	100		
81*	100		
94*	100		

\* for 16:9 projection screens

## WENTEX H Modules

The H Modules are used to extend an A Module up to the height that is needed (up to 6 metres maximum). They too come with inner bracket connecting components for connecting corners and straight parts in one frame together. The same Module Clamps can be used to connect multiple H Modules together horizontally, at a right angle, or to a round Pipe & Drape Upright or truss.

Please note that for connecting an H Module to an A Module you will need two additional pieces of the Wentex Connection Strip for SET Frame.

Height (cm)	Width (cm)	Height (ft)	Width (ft)
